Did you know...at least 28 billion pounds of edible food are wasted each year – or over 100 pounds per person. Putting one less cookie on Santa's plate will reduce his snacking by about 2 million pounds.

HOME SWEET HOME

There's no place like home, especially during the holidays, so why spend so much time, energy, and money traveling when everything you need is right at home? Pretend you're a tourist visiting your own town. Call the AAA, visit your Chamber of Commerce and visit the local government website. You'll probably be amazed at the attractions you've taken for granted and never visited.

Also, by staying home you can: [] Reduce the amount of gas used during a heavy travel time. [] Help keep your local economy strong, making for a vital and thriving downtown - a key to reducing suburban sprawl and related problems of habitat destruction and loss of biodiversity. Did you knowif each family reduced holiday gasoline consumption by one gallon (about twenty miles), we'd reduce greenhouse gas emissions by one million tons? LIGHTS CAMERA ACTION [] Get outdoor light strands that are wired in parallel. These have separate circuitry so that if one bulb blows out the rest will keep shining; all you have to do is replace the bulb. Those strands sold with series wiring stand or fall together, making it almost impossible to find and replace a single blown-out bulb. [] Remember, the smaller the bulbs, the lower the wattage. Low wattage has two advantages: it consumes less energy and gives off less heat, making your lights safer. [] Bring your own camera instead of using disposable cameras to capture holiday memories. [] Faster film speeds, such as 400 or 800, reduce the use of flash and extend battery life. Did you knowby purchasing rolls of 36 instead of 12 exposures, you'll reduce waste by 67%, saving about \$4, or 40% in cost? LET YOUR FINGERS DO THE WALKING	website. Touil probably be amazed at the attractions you've taken for granted and never visited

[] E-commerce is the wave of the future. But remember, e-

		commerce is not necessarily waste-free. Choose items that won't be excessively packed for shipping.				
		For you Web-heads, try giving these a click:				
		www.ecomall.com				
		www.greenshopping.com				
		www.greenhotels.com				
[]	www.realgoods.com If you're shopping by mail order catalogue, remember to cancel the ones you don't need.				
Did you knowin 1981 the average household received 59 mail order catalogues, and by 1991 the number had increased 140%, to 142?						
Did you knowif each household canceled 10 mail-order catalogues it would reduce trash by 3.5 pounds per year? (If everybody did this, the stack of canceled catalogues would be 2,000 miles high!)						
BYOB						
[]	During the nation's busiest shopping season, bring your own shopping bags. Paper, plastic and cloth are all good; the latter two can be folded easily into purses and pockets until used.				
[]	Consolidate your purchases into one bag rather than getting a new bag at each store on your shopping rounds.				
FUSS-FREE GIFT GIVING						
[]	Plan your shopping in advance. Consolidating your shopping trips saves fuel (and aggravation), and you'll avoid those last minute frenzies when you won't have time to make careful gift choices.				
[]	Rather than piling up "stuff" under the tree, think about what friends and family really want or need. Try giving gift certificates if you don't know what someone wants, or simply make a donation in his or her name to a favorite charity.				
[]	Give gifts that encourage others to use less stuff, like a book about making crafts from reusable items, cookbook for leftovers, reusable tote bags.				
[]	Or simply set a good example by giving homemade food or something you've made yourself from reused items.				

[]	For kids, start a savings account or give stocks or bonds. It's fun to watch money grow and it teaches children the value of financial conservation.			
[]	Shop for gifts at antique stores, estate sales or flea markets, since one person's trash is another's treasure.			
]]	Donate unwanted gifts, along with last year's gifts that the kids have outgrown, to charity.			
K	Ш	<u>O STUFF</u>			
]]	When buying electronic toys and other portable items that are used regularly, remember to buy <u>rechargeable</u> batteries to go with them.			
[]	Instead of wrapping gifts for the kids, hide the presents, plant clues to where they're hidden and make the kids' search into a treasure hunt.			
[]	Get the kids to make their own tree ornaments out of things you already have around the house, or from materials they might find in the backyard: twigs, bark, flowers and herbs, pine cones, etc.			
[]	Old clothes and jewelry make a great dress-up box for kids.			
[]	Tools and gadgets make a great idea box for a young inventor.			
<u>C</u>	[A]	RD SENSE			
Our mailboxes burst this season with membership offerings and fundraising appeals, presents, gift catalogues and cards. What to do					
[]	Send e-greetings to family, friends and business associates who are on-line. (Try <u>The Electric Postcard</u> .)			
[]	Save yourself time, money, and hard feelings between friends – and reduce mail volume – by updating and paring down your holiday mailing list.			
[]	Be creative. Instead of buying placemats or table decorations, make your own. Cut old cards into shapes and press between two pieces of clear contact paper.			
Did you knowthe 2.65 billion Christmas cards sold each year n the U.S. could fill a football field 10 stories high? If we each sent one card less, we'd save 50,000 cubic yards of paper.					
SHOP RIGHTAND SHIP LIGHT					
[]	When buying gifts you will send by mail, pick items that are easy to ship and won't require excess packaging.			

]]	Reuse packing cartons and shipping materials such as peanuts, wood shavings, shredded newspaper and bubble wrap. Drop off extra packing peanuts at local private mailing centers. Call the Plastic Loosefill Council's <i>Peanut Hotline</i> at 1-800-828-2214 for the names of local businesses that reuse them. (Stores often offer discounts for returning packing materials like cartons and boxes.)				
WRAP IT UP						
[]	Or better yet, think of gifts that don't have to be wrapped at all: tickets to concerts, museums, or sporting events, gift certificates, house plants, or even gifts of your own time.				
[]	When giving oversized gifts like bicycles or CD racks, instead of wrapping them in paper, just tie a bow around them.				
[]	Wrap gifts in old maps, newspapers, Sunday comics or fancy holiday gift bags. Kids' art work is a perfect wrapping for presents to proud grandparents.				
[]	Use brown paper grocery bags to wrap small-to-medium size boxes that have to be mailed.				
]]	Make the wrap a part of the gift: Putting cookies in a flower pot or hiding jewelry in a new pair of gloves will keep your gift under wraps and the "wrapping" out of the trash.				
Did you knowif every family reused just two feet of holiday ribbon, the 38,000 miles of ribbon saved could tie a bow around the entire planet?						
CHOOSE TO REUSE						
[]	Get a tree that can be planted or mulched afterward, or buy an artificial one.				
[]	Compost your food waste. Fruits and vegetables and their peels, pits and seeds are all perfect for composting – a great natural fertilizer.				

For further tips on how to reduce waste in the first place, check out <u>Use Less Stuff: Environmental Solutions for Who We Really Are,</u> by Robert Lilienfeld and Dr. William Rathje, published by Ballantine Books.
